ÙÙÿÙÙÙÿÙÙÙÿÙÙÙÿÙÙÙÿÙÙDThis is not really a text file. Well, this part is, but all the gobbledygook
before this is actually an IMAGE file. Bits represent EVERYTHING in our digital world.

To finish decoding this message, copy all of the text in the box labeled BASE64 on the xlate page (http://www.d.umn.edu/~berna228/Convert.php). BASE64 is another encoding scheme that packs 6 bits into one character because 2^6 = 64.

BASE64 is just a more efficient way to pack bits together. We will decode these bits into a file containing the secret phrase. Paste the entirety of the BASE64 encoded symbols into the BASE64 decoder found here (http://beautifytools.com/base64-to-image-converter.php).

Then I went to: http://beautifytools.com/base64-to-image-converter.php

And I got the following Image:

```
Congratulations.
The secret phrase is
'It is all bits.'
```

Which is a .png image file
